

**BALTIC
PAEDIATRIC
CONGRESS**
2-4 June 2022

visit estonia

Dear colleague!

The Estonian Paediatric Association is inviting You to take part in the

5th Baltic Paediatric Congress

and the

23rd Estonian Paediatric Association Congress

taking place 2-4 June 2022 in the conference venue of Sokos Hotel Viru, Tallinn

This Congress takes place after every three years since 2011. The objective of the Congress is to bring together specialists from Baltic countries to discuss the latest developments and issues in the field. The Congress is expected to bring together around 300 medical specialists from the field of neonatal and paediatric care.

The congress was created for pediatricians, general practitioners, and other specialists, who take care of the health and wellbeing of children. The congress is a great way to acquire new information, speak to colleagues and get yourself up-to-date with the newest research in paediatrics.

The first day of the congress focuses on the mental health of children.

In addition, the organising committee has decided to arrange a Ukrainian-Baltic Solidarity Symposium, which takes place on June .
